

hackCooper.org | hosted by create@cooper | create@cooper.edu

HackCooper was a resounding success!

Cooper Union's first student hackathon was a great experience for everyone involved. Over 100 students from across the New York City area joined us for 24 hours of hacking on projects ranging from robots to web apps. Students had access to 3D printers, a laser cutter, and over \$1500 of hardware. They were advised by over 20 mentors, and had the chance to listen to a diverse set of tech talks. In the end, 27 high quality hacks were demoed, and \$2800 in prizes were awarded by a panel of judges to the best projects.

The create@cooper team would like to thank all the students, mentors, and sponsors who made HackCooper possible. We look forward to seeing each of you again!
